DEEP DOMAIN HERITAGE • ENTERPRISE RIGOR

Who We Are

15+ Years of Engineering Heritage, Tailored for Your Enterprise

Compel X Technologies is a premier enterprise systems integrator delivering secure, connected, and mission-critical digital environments. Our leadership and engineering teams bring over 15 years of proven hands-on experience executing Tier-III datacenters, sovereign cloud ecosystems, zero-trust cybersecurity, and turnkey physical infrastructure across Saudi Arabia and global technology hubs.

Operating with disciplined systems engineering and strict regulatory compliance (NCA ECC, SAMA, PDPL, and Vision 2030), we transform complex technology challenges into scalable, high-performance operational capabilities that drive sustainable enterprise growth.

"Our approach is simple: technology should solve business problems, not create additional complexity."

15+ YRS

360° CAPABILITY
SERVICES & TURNKEY SOLUTIONS

KSA VISION 2030
FULL REGULATORY COMPLIANCE

Our Vision

To become a trusted global technology partner recognized for delivering innovative, secure, and practical digital solutions that help organizations operate smarter and grow with confidence.

Our Mission

Our mission is to empower businesses through technology by combining engineering expertise, trusted technology partnerships, and customer-focused service.

What We Do

Compel X Technologies operates across two complementary areas:

Our Core Services

Our services represent the expertise, engineering, consulting, implementation, and support capabilities we provide to customers.

- AI & Data Sciences
- Cloud Migration & Hyperscaler Deployment
- IT Consultancy
- Software & Application Development
- Enterprise Support & IT Resourcing
- Managed Security Services & Compliance

Our Core Solutions

Our solutions represent the technology platforms, infrastructure, hardware, and integrated systems we design and deploy.

- ELV, Physical Security & Life Safety
- Cybersecurity & Perimeter Defense
- Unified Communications & Collaboration
- Data Center Power & Physical Infrastructure
- Enterprise Datacenter & Compute
- Enterprise Networking & Connectivity

Our Services

AI & DATA SCIENCES

Organizations generate enormous amounts of data every day. The challenge is turning that data into meaningful information and better decisions.
Compel X Technologies helps organizations explore and apply artificial intelligence, data science, analytics, and automation to improve business performance.

ARTIFICIAL INTELLIGENCE & PREDICTIVE MODELING

We help organizations identify practical AI opportunities and develop solutions that can support forecasting, optimization, prediction, classification, and intelligent decision-making.

DATA SCIENCE & BUSINESS INTELLIGENCE

We transform business data into meaningful dashboards, reports, analytics, and insights that help management understand performance and make informed decisions.

BUSINESS PROCESS AUTOMATION & NLP

We help automate repetitive processes and explore Natural Language Processing (NLP) applications for document processing, information extraction, customer interactions, and knowledge management.

EMERGING TECHNOLOGIES

We continuously explore emerging technologies that can provide practical value to our customers, including intelligent automation, advanced analytics, IoT, and other digital technologies.

Cloud Migration & Hyperscaler Deployment

MICROSOFT AZURE

Compel X Technologies helps businesses assess their existing infrastructure, plan cloud adoption, migrate workloads, and establish secure and manageable cloud environments.
Our Azure services include cloud assessment, migration planning, infrastructure deployment, workload migration, security, backup, and ongoing optimization.

AMAZON WEB SERVICES (AWS)

We support organizations in planning and deploying AWS environments according to their operational and technical requirements.

MULTI-CLOUD & HYBRID CLOUD

For organizations operating across multiple platforms, we design hybrid and multi-cloud approaches that balance flexibility, performance, security, and operational control.

CLOUD DISCOVERY & ASSESSMENT

Before migration, we assess existing infrastructure, applications, dependencies, workloads, and business requirements to develop a practical cloud roadmap.

FINOPS, BACKUP & DISASTER RECOVERY

We design FinOps, Backup & Disaster Recovery strategies intended to improve business continuity and reduce the impact of system failures, data loss, and operational disruptions.

IT Consultancy & Digital Advisory

Navigating enterprise technology decisions requires strategic foresight and objective engineering expertise. We partner with leadership teams across Saudi Arabia and globally to align IT strategies with core operational priorities.

01

Strategic IT Roadmaps

Long-term technology planning, architecture blueprints, and digital transformation roadmapping.

- **Technology Roadmap & Lifecycle Planning**
- **Sovereign Cloud & Infrastructure Blueprints**
- **Alignment with KSA Regulatory & Vision Standards**

02

Infrastructure & Systems Audit

Evaluating existing legacy environments for performance gaps, security risks, and optimization opportunities.

- **Datacenter & Network Health Assessment**
- **Cybersecurity & Compliance Gap Analysis**
- **Performance Bottleneck & Cost Optimization**

03

Technology Advisory & Procurement

Independent technical guidance for platform selection, enterprise vendor evaluation, and cost optimization.

- **Vendor-Neutral Platform Evaluation (RFP/RFI)**
- **Licensing & Enterprise Agreement Advisory**
- **Total Cost of Ownership (TCO) Reduction**

04

Project Management & Governance

Ensuring complex IT projects are delivered on time, within budget, and in full compliance with standards.

- **End-to-End Program Management Office (PMO)**
- **Quality Assurance & Vendor SLA Audits**
- **ISO & International Engineering Governance**

Software & Application Development

PRODUCT DEVELOPMENT

From concept to deployment, we support organizations in developing technology products and digital platforms.

1

WEB & CUSTOM SOFTWARE DEVELOPMENT

We develop customized web-based and enterprise software applications designed around specific operational requirements.

2

MOBILE APPLICATIONS & ENTERPRISE MOBILITY

We develop mobile solutions that help employees, customers, and field teams access business services and information more efficiently.

3

ERP IMPLEMENTATION & INTEGRATION

We support ERP implementation and integration projects designed to connect business processes, information, and systems.

4

CMS DEVELOPMENT & DEVOPS ENGINEERING

We develop and integrate content management solutions that allow organizations to manage digital content efficiently. Our DevOps approach focuses on improving collaboration between development and IT operations while supporting automation, deployment efficiency, & application reliability.

5

Enterprise Support & IT Resourcing

1 ANNUAL MAINTENANCE CONTRACTS

Our AMC services provide structured technical support and maintenance for customer environments.

2 SLA-BASED SUPPORT

We provide service-level-based support models aligned with customer requirements and operational priorities.

3 IT STAFF AUGMENTATION

Organizations can access skilled IT professionals and technical resources based on project or operational requirements.

4 IT CONSULTING

We provide technology consulting, IT roadmaps, infrastructure planning, and project implementation support.

5 MANAGED HELP DESK OPERATIONS

Our managed services help organizations outsource selected IT operations while maintaining visibility and control.

Managed Security Services & Compliance

Cybersecurity is now a fundamental part of every organization's technology strategy. Compel X Technologies provides security services designed to help organizations identify risks, protect critical assets, monitor threats, and improve their security posture.

01

MANAGED SECURITY OPERATIONS CENTER

Our SOC capabilities support security monitoring, event analysis, incident detection, and response activities.

02

VULNERABILITY ASSESSMENT & PENETRATION TESTING

We help organizations identify security weaknesses through structured vulnerability assessment and penetration testing activities.

03

SAMA

الهيئة الوطنية للأمن السيبراني
National Cybersecurity Authority

KSA PDPL

REGULATORY COMPLIANCE & GOVERNANCE

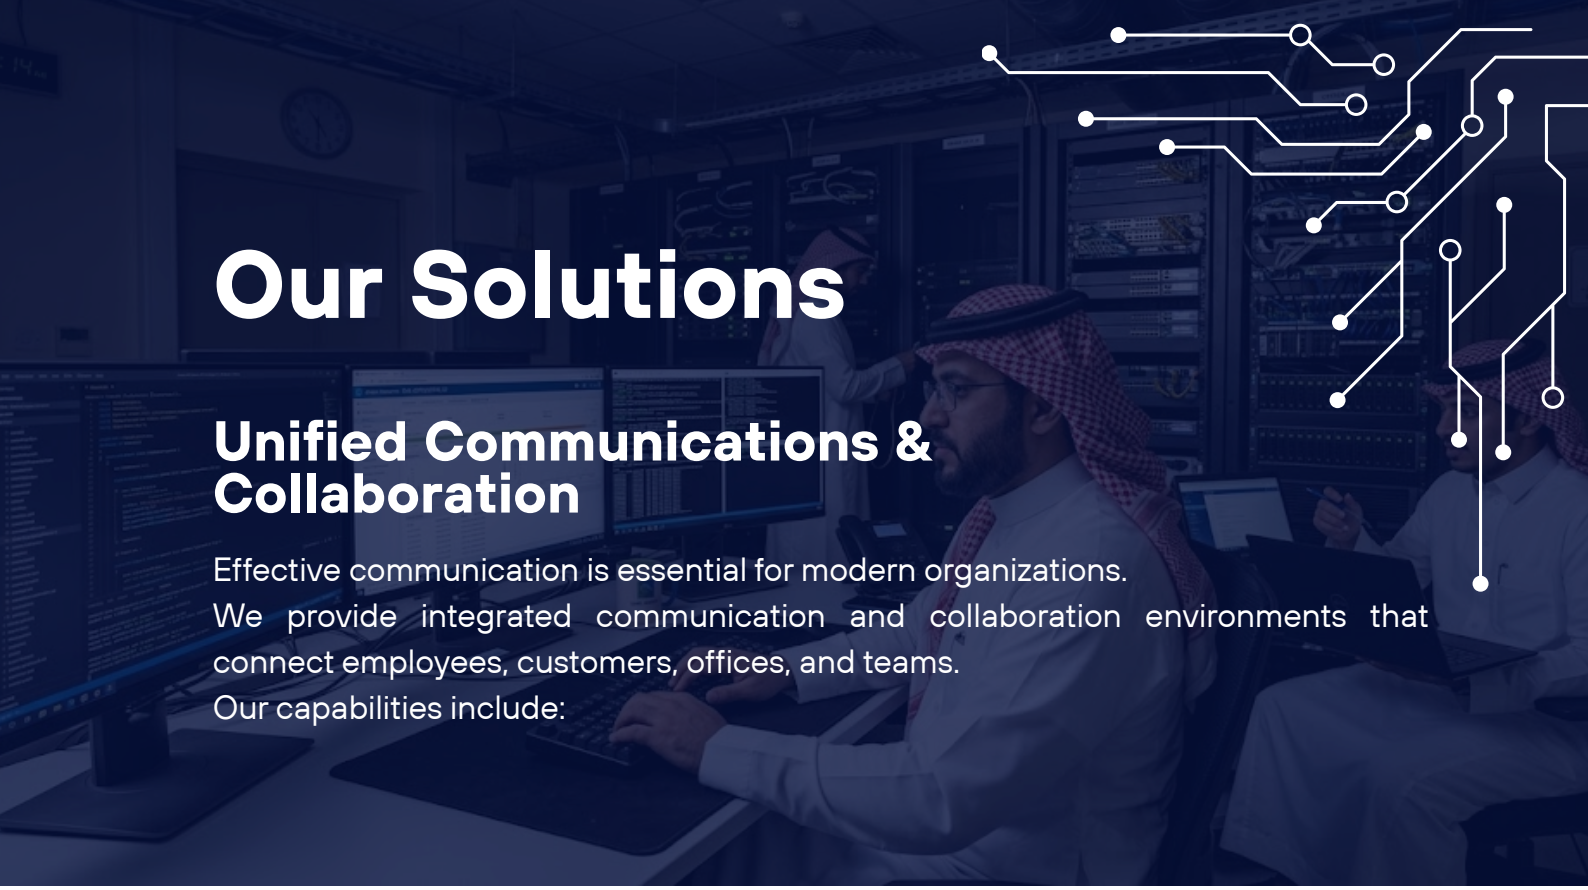

National Cybersecurity Authority (NCA) requirements
Saudi Central Bank (SAMA) requirements where applicable
Personal Data Protection Law (PDPL)
Customer-specific security and governance requirements

04

ENDPOINT & CLOUD SECURITY

We help secure endpoints, cloud environments, networks, and other critical technology assets through appropriate security architectures and controls.

Our Solutions

Unified Communications & Collaboration

Effective communication is essential for modern organizations.
We provide integrated communication and collaboration environments that connect employees, customers, offices, and teams.
Our capabilities include:

1. Enterprise Telephony & Cloud PBX
2. Unified Communications
3. Video Conferencing
4. Smart Boardrooms & Audio-Visual Integration
5. Collaboration Platforms
6. Contact Center Solutions
7. Omnichannel Customer Engagement

Our objective is to create communication environments that are reliable, easy to manage, and aligned with business requirements.

ELV, Physical Security & Life Safety

We design and integrate technology solutions that help organizations protect people, facilities, assets, and operations.
Our capabilities include:

1. IP Surveillance & CCTV
2. Access Control Systems
3. Biometric Security
4. Visitor Management
5. Fire Alarm Systems
6. Life Safety Systems
7. Integrated Security Solutions

We focus on creating integrated environments where security systems can work together effectively rather than operating as isolated technologies.

Enterprise Networking & Connectivity

Enterprise LAN & WAN Architecture

High-availability local and wide area network design optimized for high-density traffic, resilience, and seamless cross-site connectivity. We deliver multi-gigabit campus core, distribution, and access switching paired with redundant link aggregation and high-availability failover mechanisms. Our architectures seamlessly integrate fiber optic backbones and carrier-grade MPLS to ensure deterministic performance and zero-packet-loss transport across corporate campuses, regional sites, and datacenters.

Secure SD-WAN, Wireless & Campus Mobility

Software-defined WAN and enterprise Wi-Fi architectures engineered for dynamic traffic management, cloud optimization, and seamless user mobility. Our solutions leverage application-aware dynamic path selection and intelligent bandwidth control to maximize cloud application performance and eliminate WAN downtime. We deploy high-density Wi-Fi 6E and Wi-Fi 7 enterprise wireless environments complete with secure guest access portals, seamless roaming, and integrated Network Access Control (NAC) frameworks.

Next-Generation Routing & Core Edge

Advanced edge routing solutions delivering deterministic traffic steering, carrier-grade throughput, and secure inter-site transport. Featuring Border Gateway Protocol (BGP) implementation and automated route optimization, our core edge systems ensure uninterrupted data transfer across complex multi-cloud topologies. We integrate Zero-Trust Network Access (ZTNA), IPSec-encrypted tunnels, direct cloud on-ramps, and hybrid datacenter interconnects to guarantee robust security and uninterrupted operational continuity.

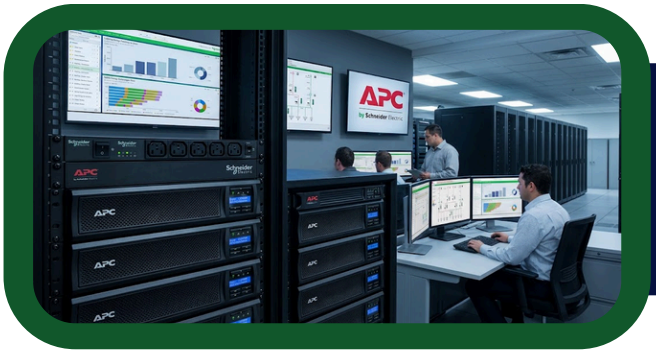

Structured Cabling, IoT & Smart Buildings

End-to-end physical layer cabling and IoT connectivity enabling intelligent building automation, sensor networks, and environmental control. We engineer high-performance Cat6A and Cat7 copper and single/multi-mode fiber cabling infrastructures backed by high-wattage Power over Ethernet (PoE++ / 90W) to reliably power smart lighting, security sensors, and building automation controllers. Complete with precision datacenter patching, rack cable management, and fiber trunks, we establish a clean, future-proof physical foundation for digital operations.

Data Center Power & Physical Infrastructure

A reliable data center requires more than servers and storage.
Power protection, cooling, racks, monitoring, cabling, and physical infrastructure all contribute to overall availability.

UPS Systems & Power Management (APC / Schneider Electric)

Data Center White Space Design & Precision Cooling

Rack-Level Power Distribution (Smart PDUs)

Environmental Monitoring & Early Fire Detection Systems

We help organizations create structured and manageable physical environments that support critical IT systems.

Enterprise Datacenter & Compute

Organizations require dependable computing and storage infrastructure to run critical applications and services.
Our data center portfolio includes:

Enterprise Compute & High-Density Servers (Dell / HPE)

Enterprise Storage & SAN/NAS Management (NVMe Arrays)

Hyper-Converged Infrastructure (HCI) Clusters

Virtualization & High-Availability Architecture

We work with customers to select and integrate infrastructure based on workload requirements, performance expectations, scalability, availability, and budget.

Cybersecurity & Perimeter Defense

Next-Generation Firewalls

Advanced firewall and threat prevention technologies designed to control network traffic and protect enterprise environments.

Endpoint Detection & Response

Endpoint security solutions designed to improve visibility into endpoint activity and support threat detection and response.

Microsoft 365 Security

Security solutions supporting identity, productivity, collaboration, and endpoint environments within the Microsoft ecosystem.

SASE & Zero Trust

Modern security architectures designed around identity, access control, continuous verification, and secure connectivity.

Why Compel X Technologies

Saudi Arabia & Vision 2030

رؤية VISION 2030
المملكة العربية السعودية
KINGDOM OF SAUDI ARABIA

Saudi Arabia is undergoing a significant transformation driven by digitalization, innovation, infrastructure development, and the growth of technology-enabled businesses.

Compel X Technologies operates within this evolving technology landscape and aims to contribute to the digital transformation of organizations operating in the Kingdom.

Our capabilities across **cloud, AI, cybersecurity, networking, data centers, smart infrastructure, automation, and enterprise IT** can support organizations as they modernize their technology environments.

We believe that digital transformation is not simply about adopting new technology.
It is about using technology to create better processes, stronger organizations, improved services, and sustainable business value.

Industries We Serve

Our technology capabilities can support organizations across multiple industries, including

01 Oil & Gas

02 Construction & Engineering

03 Government & Public Sector

04 Healthcare

05 Banking & Financial Services

06 Education

07 Hospitality & Real Estate

Brand Ecosystem & Strategic Partners

At Compel X Technologies, we collaborate with global technology leaders, enterprise original equipment manufacturers (OEMs), and cloud innovators to deliver resilient, benchmark-setting digital solutions. By combining world-class hardware and software platforms with our localized engineering capabilities, we ensure every enterprise solution is built for performance, compliance, and long-term business scalability.

Let's Build What Comes Next

Whether you are modernizing an existing IT environment, building a new data center, moving workloads to the cloud, strengthening cybersecurity, developing a software platform, or creating a connected enterprise, Compel X Technologies can help you move from requirement to implementation.
